### ==INVENTARISATION ASSESMENT==

Dear mrs. Wahlstedt

Your Schapendoes Twinflowers II Tasso az Tobi was assessed on 05-01-2017 by Mrs. Anne-Cathrine Unelsrød.

In this respect, the Dutch Breeding advisory committee (FAC) has assessed its suitability to contribute towards the advancement of the breed.

#### **Result: SUITABLE**

This assessment is a recommendation for breeding due to the inventarisation. In addition to this assessment, the existing breeding rules for each country must be followed

On behalf of the breeding advisory committee,

1/0  
  
Irma Thissen

A dog is qualified to breed (*according to Dutch rules*) if either:

- a. At a maximum of two inventories it is assessed to be "suitable to contribute to the advancement of the breed". These inventories have to be done by two different judges qualified for the breed and trained in the Netherlands. The dog must be at least 15 months old and there must be at least 6 months between the two inventories, unless the dog is older than 24 months.
- b. Or, if it has been assessed at an inventory to be "suitable to contribute to the advancement of the breed" and also has been awarded the qualification of Very Good or Excellent at least twice at a club match organized by the Schapendoes Club or at a CAC/CACIB show, whereby the qualifications must be awarded by different judges qualified for the breed and trained in the Netherlands. Furthermore, at least one of these show qualifications must have been awarded when the dog was 21 months or older.
